LinkedIn: [in/markobogdanovski](https://in/markobogdanovski)  
Email: [mr.bogdanovski@gmail.com](mailto:mr.bogdanovski@gmail.com)

Senior Software Engineer with 8+ years of experience designing, building, and leading full-stack SaaS solutions. Possess proven expertise in end-to-end management of new project development, specializing in designing and delivering customized applications and services for business clients.

## Work Experience

### CHI Software

**Software Developer** • September 2024 — Currently

- Developed custom AG Grid components, including a fiscal year selector and feature access builder, resulting in improved user functionality and workflow efficiency.
- Implemented workspace feature for checkout process, leading to 30% faster checkout times.

#### Skills

SvelteKit • Websockets • AG Grid • Monorepo • Tailwind • AWS • DuckDB • GitLab CI/CD

### Ledger Leopard

**Senior Software Engineer** • August 2023 — March 2024

- Conducted in-depth analysis to identify platform bottlenecks, improving overall code performance and workflow efficiency by 20%.
- Implemented Auth0 authentication.
- Built Azure AI Document Intelligence workers for document processing.
- Developed a Scraper service for business websites as a resource for AI Chatbots.
- Integrated User Roles and Policy management into the existing codebase.

#### Skills

NextJS • NestJS • RxJS • OpenAI • Azure AI Search • Azure Cognitive Services • Azure Document Intelligence • Azure Blob Storage • MongoDB • Auth0

### Elemental

**Frontend Lead** • Jun 2021 — August 2023

- Worked closely with the CTO to define and optimize feature release cycles, resulting in a 70% reduction in prototype development and 25% faster feature deployments.
- Developed key platform features such as **Journeys** (Automated Workflows) and **Campaigns**.
- Coordinated frontend team to align them with the timeline and the product vision.
- Set up and integrated S3 and Lambda services for asset storage, resizing, and parsing.
- Interviewed and onboarded new team members alongside the CTO.
- Managed systems with nearly 100 million monthly campaigns, ensuring stability and scalability of services.
- Worked with developers from Beefree and React Flow to address security risks and suggest core-level improvements.

#### Skills

React • NextJS • GraphQL • React Query • PostgreSQL • Docker • AWS EC2 • AWS S3 Storage • Vercel

### Artis Technologies (Momnt)

**Frontend Developer** • January 2020 — Jun 2021 • Full Time

- Developing platform components from Figma.
- Developed onboarding and fraud check widgets for the clients' websites.

#### Skills

VueJS • NuxtJS • Tailwind • AWS • Typescript • GitLab CI/CD • Jenkins

### Serbia BroadBand

**Software Engineer (Hosting Platform)** • August 2016 — December 2019 • Full-Time

- Initiated and led UI redesign of Hosting and Cloud Platform.
- Collaborated across the teams to deploy platform instances for Montenegro and Bosnia & Herzegovina.
- Implemented robust solutions, including 3D secure payment gateway, cross-domain session handling, ensuring secure and seamless user experiences.
- Developed features for a Cloud Hosting Platform using the OnApp platform, including Remote Terminal Console, Disk Resizing, Automated OS Installation, and Server & Disk Renaming.

#### Skills

Symfony 2 • Zend 1 • OnApp • jQuery • OracleDB • JWT Auth

# Skills

## Hard Skills
