EDUCATION

High School Diploma,
Digital Communication and
Media/Multimedia

Sep 2012 - March 2016

- Elektrotehnička škola „Nikola Tesla“
- Pančevo

HARD SKILLS

- NestJS
- React
- Vue
- Laravel / Symfony
- FastAPI
- PostgreSQL
- MongoDB
- Redis

SOFT SKILLS

- Communication
- Critical thinking
- Project management
- Leadership
- Problem Solving

TOOLS / PLATFORMS

- AWS
- Azure
- Cursor AI
- Claude
- Codex
- Docker
- Jira
- Grafana k6

WORK EXPERIENCE

Virtuelni Asistent

Remote

March 2026 - Currently

Co-Founder

Developing agentic platform on AWS using NestJS, MCP servers using Python. Implementing functions for embedding, re-ranking, and document summarization generation using AWS Bedrock and Lambda functions. Integrated Redis for Semantic Search caching, SQS for storing conversations for permanent storage. LangChain for model orchestration and MCP servers to work with clients internal workflows.

**LangChain • AWS Bedrock • AWS SQS • AWS SES • AWS Lambda • AWS S3
AWS EC2 • NestJS • NextJS • Docker • PostgreSQL • Python • Redis**

CHI Software

Remote

AI Implementation Architect

September 2024 - March 2026

- Designing ETL & RAG pipelines using Azure Services
- Implementing KYC Verifications using Azure AI Face and Document Intelligence
- Developed Parsing, Chunking, and Tokenization using tiktoken
- Implemented workspace feature for checkout process

**React • WebSockets • NestJS • Typescript • Azure AI Studio • Azure OpenAI
Azure AI Face • Azure AI Search • Python**

Ledger Leopard

Remote

Senior Software Engineer

August 2023 - March 2024

- Conducted in-depth analysis to identify and optimize platform bottlenecks, improving overall code performance and workflow efficiency.
- Developed new features integrating OpenAI and Azure Services.
- Built Azure AI Document Intelligence workers for document processing.
- Created a Scraper and Parser worker service for business websites as a resource for ChatBot.
- Integrated User Roles and Policy management into the existing codebase.
- Implemented social logins using Auth0

**NextJS • NestJS • OpenAI • Azure AI Search • Azure Cognitive Services
Azure Document Intelligence • Azure Blob Storage • MongoDB • Monorepo
Typescript • Auth0**

Elemental

Frontend Lead

Remote

Jun 2021 - August 2023

- Managed systems with nearly 100 million campaigns, ensuring stability and scalability of services.
- Collaborated closely with the CTO and management to define and optimize feature release cycles.
- Coordinated frontend team to align them with the timeline and the product vision.
- Set up and integrated S3 and Lambda services for asset storage, resizing, and parsing.
- Interviewed and onboarded new team members alongside the CTO.
- Led the development of key platform features such as Journeys (Automated Workflows) and Campaigns.
- Collaborated with the CTO to build a platform from the ground up, managing timelines and setting strategic directions.
- Worked with developers from Beefree and React Flow libraries to address security risks and suggest core-level improvements for feature implementation.

**React • NextJS • NodeJS • GraphQL • Tanstack Query • Zustand • PostgreSQL
JWT Auth • Docker • AWS EC2 • AWS S3 Storage • Vercel**

Momnt

Senior Frontend Developer

Remote

January 2020 - June 2021

- Developing platform components from Figma.
- Developed onboarding and fraud check widgets for the clients' websites.

VueJS • NuxtJS • Tailwind • Figma • Typescript • Gitlab CI/CD

Serbia BroadBand

Software Engineer

Belgrade

August 2016 - June 2021

- Lead redesign of Hosting and Cloud Platform.
- Conducted thorough testing and implemented robust solutions, including 3D secure payment gateway and User microservice for cross-platform systems.
- Developed features for a Cloud Hosting Platform using the OnApp platform, including Remote Terminal Console, Disk Resizing, Automated OS Installation, and Server & Disk Renaming.
- Collaborated with network engineers and system administrators to deploy product instances for Montenegro and Bosnia & Herzegovina.
- Gained expertise in cross-domain session handling, ensuring secure and seamless user experiences.

**Symfony 2 • Zend 1 • OnApp • Javascript • jQuery • Oracle DB • JWT Auth
WebSockets**
